Better Built Mine Infrastructure

GEOWEB®

3D Soil Confinement

This resource package offers tools & resources to design high-performing, long-lasting mining infrastructure—haul & access roads, embankments, channels and ponds.

How 3D Soil Confinement

Benefits Mining

Resources
for your project 

Strengthens & Transforms Fill

With the 3D GEOWEB® system, fill materials are confined and stable—even under the heaviest loading or steepest grades.

The benefits? Higher performance and lower maintenance of haul roads, reclaimed slopes, channels and containment ponds.

- [Visit our Photo Gallery](#)
- [See Project Case Studies](#)

BENEFITS

Delivered by the 3D GEOWEB® System

Resources 
for your project

Access & Haul Roads

Stable Driving Surface

3D-stabilized fill offers notable cost savings benefits to your mining operations:

- Faster cycle times (2-3X)
- Virtually eliminates rutting & wash-boarding
- Lowers rolling resistance
 - reduces to 3% vs typical 8% rate
- Improves tire life, reduces tire damage & tire expense
- Higher fuel savings

BENEFITS

Delivered by the 3D GEOWEB® System

Resources
for your project 

Access & Haul Roads

Bridges Soft Subgrades in Single Layer

- Supports heavy vehicles over soft ground with a single GEOWEB® layer vs. multiple layers of geogrid.
- Allows access over soft, wet areas in underground mines.

See GEOWEB®
Underground Mine Roads>>

PRESTO

Access & Haul Roads BENEFITS

Reduces Cross Section Thickness

GEOWEB-confined base delivers structural benefits that reduce cross section thickness by up to 60%.

The improvement results in **significantly less installation and rehabilitation costs.**

Up to 60%
Less Cross
Section

BENEFITS

Delivered by the 3D GEOWEB® System

Resources 
for your project

Access Over Liners

Driving Ramps into Ponds

- Creates stable ramp over liner system to access evaporation ponds.
- Protects the liner from damage caused by large loaders & dump trucks required to remove accumulated sediment from the ponds.

Resources 
for your project

Tailings Protection

Mine Waste Containment & Storage

- GEOWEB® confinement performs as horizontal surcharge cover over saturated mine tailings.
- Allows applying vegetation over liner system on steep slopes.
- Stabilizes aggregate with smaller, lower cost D₅₀ stone.

BENEFITS

Steep Slope Rehabilitation & Erosion Control

Resources
for your project 

Slope Reclamation

Remediation of Cut + Fill Slopes

Protect and stabilize vulnerable open pit cut slopes and roadway embankments with the GEOWEB® 3D system.

- Allows steeper slopes to be constructed ($>45^\circ$).
- Solves soil erosion and slope-surface stability problems not possible with 2D planar systems.

BENEFITS

Delivered by the 3D GEOWEB® System

Resources
for your project 

Slope Reclamation

Lower Environmental Impact

- With permeable topsoil/vegetation or aggregate fill, GEOWEB® slopes infiltrate water at the point of contact.
- Low environmental impact by limiting stormwater runoff, soil loss, and impacts to downstream waterways.

Slope Covers

Protection to Impervious Liners

- Protect pond & tailings liners from damage and environmental degradation with GEOWEB® 3D covers.
- Tendoned anchoring system secures 3D cover system without penetrating anchors.
- Supports all infill types—vegetation, aggregate & concrete.

for your project

Deep Erosion Protection

Use of Waste Rock

- Use on-site waste rock for no-cost, no-maintenance, 3D deep slope erosion protection.
- GEOWEB® sections are efficient to deploy—and fast to install by local laborers.

See Use of On-Site Rock
at Mine Slope Cover Project >>

for your project 

Drainage Channels BENEFITS

Stormwater & Wastewater Control

Drainage & Conveyance Channels

Construct GEOWEB® drainage and diversion channels to convey stormwater across tailings on mine sites.

- Use no-cost, on-site waste aggregate
- Concrete for hard-armored protection of higher velocity, continuous flows

See Mine Channel Project
Using On-Site Rock>>

Containment Basins BENEFITS

Process Ponds

Mine Tailings Ponds & Storage

Protect critical liners in solution/ evaporation ponds, and stormwater/ tailings storage containment basins with a hard-armored system.

Prevent puncture & environmental degradation with the tendoned GEOWEB® 3D liner cover.

See Process Pond Slope
Cover Project>>

Let Us Evaluate Your Project

Your site has problems.

Soft ground. Poor drainage. Heavy loading. Limited road building resources. Vulnerable slopes. Environmental regulations & concerns.

How can we help?

Arrange a meeting with our engineers to evaluate the feasibility of our solutions to meet your site's unique challenges.

Email info@prestogeo.com to request a project evaluation.
